

SES BIN LIFTER

Description

Hydraulic powered tipper to rotate bulk bins through 90 degrees for emptying process.

Benefits

Ensures safe handling of bulk bins in a controllable fashion.

Operation

The bulk bin is placed in the receiving table, and it is located by holding bars. The bin can then be tipped through 90 degrees for emptying by manually operating the hydraulic control.

Scope of supply

Manufactured as a standalone unit, from mild steel, and an integrated hydraulic power pack and control. Can also be supplied with a remote control for operation from mobile plant. Finished in painted or galvanised as required. Option to manufacture in 304 grade stainless steel if required.
