

## SES CUSTOMS INSPECTION TABLES

### Description

A fixed table with a sliding top designed for parcel or baggage inspection.

### Benefits

Processing heavy parcels or baggage requires no lifting after inspection, as the table is designed to be installed between an incoming conveyor, and the completed inspection conveyor.

### Operation

The tables are designed to fit between conveyor lines with a 3,000 mm gap. The table closed is 1,800 mm, and the sliding top movement of 1,200 mm takes the table to the out feed conveyor.

### Scope of supply

The tables are manufactured from stainless steel, and have a plated steel roller system. They are not designed for food grade handling. The table can be manufactured for either left or right hand sliding movement for matching back-to-back operation. Tables are fitted with bolt down adjustable feet.
