

SES SPIRAL DECLINE CONVEYOR

Description

A gravity roller conveyor for lowering cartons from an upper level to a lower level.

Benefits

Minimum space required, no power required. Will convey frozen or fresh product.

Operation

Cartons are introduced at the top point of the spiral, and naturally decline to the discharge. Speed can be controlled by the decline angle manufactured, and product can be slowed with the addition of braking belts fitted to the rollers.

Scope of supply

Currently manufactured for the food industry from 304 grade stainless steel, and poly rollers. The spiral is mounted on bolt down adjustable feet.
