

TWIN TRAY MEDICAL GURNEY

Description

Southern Engineering Solutions medical gurney, twin level, in stainless steel.

Benefits

Increased cadaver storage with two per gurney, increased availability of cadavers for medical research or in teaching facilities.

Operation

The two level gurney trays can be rotated from the lower to upper levels, or vice versa, either by using a hand crank or by the use of a battery powered drill.

Scope of supply

The units are mounted on four castors, all with braked wheels, and two castors are fitted with steering locks for ease of positioning or steering during corridor movements.
